\*548 Fluorescent Blue

ARTISTIC ACRYLIC™ Products may be intermixed to create an infinite number of colors. Fluorescents may be mixed with metallics, metallics with standard colors, standard colors with fluorescents, or any combination of ARTISTIC ACRYLIC™ Products. ARTISTIC ACRYLIC™ colors are special ultra-deep high intensity colors that are made for use in the display, art and show fields. Made from an acrylic-resin, ARTISTIC ACRYLIC™ colors will retain their sharpness and clarity for a longer period of time than conventional acrylic paints. All products in the ARTISTIC ACRYLIC™ color line may be thinned and cleaned up with water.

A word of caution regarding the use of fluorescents, reds and yellows: These colors must be used over a solid background for satisfactory results. A coat of #565 Blockout White, will provide the proper surface. For special effects when using black lights, use #519 Black for the background.

**Artistic Acrylic™ Products are NON-TOXIC, LEAD FREE and NON-MERCURIAL**
